E.V.S "Animals" and "sky"

Under the EVS project "animals", we will learn the difference between wild, farm and pet animals. The children will understand their eating habits, their homes and what their babies are called.

Pet animal: A pet is an animal kept for companionship and enjoyment at home.

Wild animal: A wild animal is one that can survive in its natural environment without the help of people. Most of them live in the forest.

Farm animals: Animals that are kept in the farm to help us are called farm animals.e.g. Cow, goat and buffaloes to give milk, hens are kept to give eggs etc.

Under the topic "sky" children will be introduced to the various celestial bodies in the sky. They will be explained how day and night occur. They will be encouraged to observe the sky at various times of the day. They will also learn and do experiments to study about day and night in different parts of the world. They will be told about how far the sun is, how moon shines, where the moon and the stars disappear during the day.

Rhymes: "Old mc Donald", Turtle

Computer: – Introduction to Delete Key
Introduction to Insert Key
How to Start Computer
How to Shut Down the computer
